Depression Detection using Machine
Learning Techniques

Damak Kapoor

Analyst at Goldman Sachs | Economic Times Campus Star Award
2020
Delhi

Summary

A passionate and self motivated individual, enthusiastically eager to
learn and explore.
Embodies integrity, strong work ethics and works proactively
to leverage intuitive problem solving aptitude and strong
communication skills to articulate innovative tangible solutions in a
dynamic business environment. Endorses mutual respect, humility
and collaboration to foster a team conducive to creativity and holistic
growth to achieve sustainable goals.

Be it collaborating with Alzheimer's Disease Neuroimaging Initiative
to design and develop a model to detect and classify Alzheimer's
using transfer learning and neural networks or the research project
on Detection of Depression using Machine Learning which got
published in the International Conference of Artificial Intelligence and
Speech Technology, AIST 2019 or my project on Cyberbullying and
Harrassment Detection using Artificial Intelligence with won National
Technical Paper Presentation Competition SCROOLS 2019, I always
strive to leverage my skills to create elite models which would have a
profound social impact.

I would describe myself as an empowered unapologetic articulator
who believes we do not need choose a forte, it's high time we break
the moulds people except us to fit in and pour our hearts in doing
anything and everything we want and shine on!

Hence, I am an engineer, a blogger, a stand-up comedian, an actor,
an orator, public speaker, RJ and a national-level judo player
